Scanify Cards Device

DEVICE FEATURES

📟 Computer + Scanner in One Device

We have integrated a complete computer with a scanner into a single, cost-effective, compact device.

💳 Dual-Sided Scanning of Cards in One Process

We have developed a mechanism for scanning both sides of cards in one process to speed up operations and save time.

🔲 AI Data Extraction Using Artificial Intelligence

We extract the data printed on both sides of the cards in a textual format for various uses.

🗄 Storing Data in Various Ways

The device Stores the data extracted either in its internal memory or on a server via the network, or it can be used to fill in fields for a program or directly print on paper forms.

📄 Saving Data in Multiple Formats

The device compiles the data after formatting it according to the client's preferences and saves it in multiple formats such as (PDF, Word, Excel and more).

SPECIFICATION

PROCESSOR
Quad-Core 64-bit Arm Cortex A76

WIFI
Dual-band 802.11ac

ETHERNET
Gigabit Ethernet, with PoE+ support

RAM
LPDDR4X-4267 SDRAM

BLUETOOTH
5.0 / Bluetooth Low Energy (BLE)

USB
2×USB 3.0 and 2×USB 2.0 ports
